

VoIPdito joined forces with Voxbone to provide global VoIP service

[VoIPdito](#), the leading provider of business telephone solutions based on VoIP (Voice over IP) technology and [Voxbone](#), the market leader in providing worldwide geographical, toll-free and local telephone numbers announced today a completion of integration of their systems.

London (UK), 7th November 2011 - Hugh Porter, Chief Technical Officer, VoIPdito said "From now on our customer will be able to extend their global presence to more than 4000 cities in 51 countries around the world. Thanks to our partnership with Voxbone, for example, a company with offices in Hong Kong can use [virtual telephone numbers](#) in France allowing them to be closer to their clients in Europe."

Businesses of all sizes can benefit from high quality network operated by Voxbone and feature rich hosted PBX service from VoIPdito to streamline their communications. Thanks to close integration of both company's systems virtual telephone numbers are ready to use within minutes from subscribing in web based control panel.

"We are very happy to sign up VoIPdito as a premium reseller." said Rod Ullens, CEO at Voxbone. "Small and medium sized companies are turning to cloud based communications services at a rapidly growing pace, especially in technology oriented countries such as the UK. We believe VoIPDito is well positioned to seize this opportunity."

[VoIPdito Hosted PBX](#) allows businesses to be more productive without the expense of buying and managing on-site telephone system. It offers all enterprise features at small price. What is more, local company can now become global thanks to virtual telephone numbers available worldwide for instant use.

###

About Voxbone

Headquartered in Brussels, Voxbone is the market leader in worldwide geographical, toll-free and iNum telephone numbers. Voxbone enables Internet communications services providers, wholesale carriers and mobile and fixed national operators to extend their network reach internationally, rapidly and with limited costs. Voxbone delivers high-quality inbound communications from more than 51 countries and more than 4,000 cities, using its private global carrier-grade VoIP network, which originated 2.1 billion minutes of traffic in 2010.
